

Security

TrustWave Approved

Conference Manager is certified by the TrustWave TrustKeeper Remote Compliance Program. This program has been accepted by VISA as meeting its Cardholder Information Security Program, by American Express as meeting its Data Security Standards (DSS) and MasterCard's Site Data Compliance program.

Quarterly System Scans

Conference Manager servers are subject to vulnerability scans and penetration testing every 90 days by a third party.

Data Encryption

All data transfer in Conference Manager is encrypted, using 128-bit encryption.

Firewall and Virus detection

Conference Manager databases are protected by the latest firewall technology, intrusion detection and anti-virus systems.

Physical Security

Conference Manager's servers are located in a financial institution in Victoria, British Columbia. In other words, the servers are highly secure in the 'real world'.

User Management

User access to the system is controlled by password protection. All access to the system is encrypted.

Data Protection

Conference Manager's has a stringent privacy policy which is compliant with international privacy laws. As part of our privacy policy, we do not store any sensitive personal information. For example, we do not hold credit card numbers.

Data Back-Ups every 15 minutes

We back-up your data to a remote location every 15 minutes.
